**DETAILED ACTION**

1. This application claims benefit of the foreign application:  
UNITED KINGDOM 0226550.2 with a filing date 11/14/2002.
2. Claims 1-9 are pending in the application.

***Information Disclosure Statement***

3. Applicant's Information Disclosure Statement, filed on May 11, 2005 has been considered. Please refer to Applicant's copy of the 1449 submitted herein.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5-6 and 8-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 5-6 and 8-9 provide for the use of compounds/composition of formula (I), but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 5-6 and 8-9 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an

improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

### ***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-9 are provisional rejected under the judicially created doctrine of obviousness- type double patenting as being unpatentable over claim 32-34, 38 and 41 of Natsch et al. co-pending application No. 11/746,401. Although the conflicting claims are not identical, they are not patentably distinct from each other and reasons are as follows.

Applicants claim compounds/compositions of formula (I), i.e.,

and their methods of use, see claim 1. Dependent claims 2-9 further limit a number of variable, i.e., the compounds are used for suppressing axillary malodour.

Natsch et al. claim compounds/compositions of formula (I), i.e.,

, wherein the variable Y is an alkylene group, the variable X is a phosphinyl group (III), and their methods of use, i.e., suppressing axillary malodour.

The difference between the instant claims and Natsch et al. is that the variable X of formula (I) of Natsch et al. represents a methylene thiol group (II) or a phosphinyl group (III), while the instant claims represent a phosphinyl group (III) at the same position. Natsch et al. compounds/compositions overlap with the instant invention.

One having ordinary skill in the art would find the instant claims 1-9 prima facie obvious **because** one would be motivated to employ the compounds/compositions of Natsch et al. to obtain the instant compounds/compositions of formula (I) and their methods of use. Dependent claims 2-9 are also rejected along with claim 1 under the obviousness- type double patenting.

The motivation to obtain the claimed processes derives from known Natsch et al. compounds/compositions would possess similar activity (i.e., suppressing axillary malodour) to that which is claimed in the reference.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
